

Biotirin[®]

helps to improve hair growth by supplying the hair with nutrients, including:

Calcium Pantothenate

The essential vitamin calcium Pantothenate stimulates metabolic activity in human keratinocytes (key cells in hair) and is thus important in the nutritional support of normal hair growth and quality.

L-cystine

The amino acid L-cystine is a building block of the hair substance keratin and thus an important component of the hair.

Biotin

Biotin is a vitamin that is vital for the synthesis of the hair substance keratin.

Millet Extract

Biotirin[®] capsules contain millet extract, a source of the phytosterol miliacin, which increases proliferation and metabolic activity in human keratinocytes (key cells in hair).

Study confirms effectiveness

Improvement is noticeable

Women who treated their hair with **Biotirin®** as part of a study were able to notice a clear increase in hairs undergoing growth.**

The Biotirin® Hair Care Program.

Hair growth progresses very slowly and requires a little patience. Therefore it is recommended that you take 1 **Biotirin®** capsules daily with food for a period of 3 to 6 months.

After 3 to 6 months of the **Biotirin®** hair care program the nutrients will have stimulated and improved hair growth and hair re-growth.

Biotirin® is also suitable for long-term use and can be repeated throughout the year if necessary.

Each capsule contains:

Biotin	200 mcg
L-Cystine	6 mg
Vitamin B₅	30 mg

Other ingredients:

Millet Extract
